

Keep your employees—
and your business—
healthy

Host an on-site flu vaccination clinic

Influenza (the flu) and other viruses like COVID-19 are serious public health issues. These extremely contagious and dangerous viruses can have a major impact on your people and your organization—especially when they happen together.

The flu can affect the overall well-being of your employees and their families as well as your bottom line. The illness has wide-reaching effects on individuals, health care systems, and U.S. employers. Annually, it is estimated to cost billions of dollars in direct and indirect medical costs, including millions of days of lost productivity.

The workplace provides an excellent environment for spreading these viruses,² first among co-workers and then to others in the community. Offering an on-site clinic can help your employees and their loved ones stay healthy.

**During the
2018-2019 flu
season, the CDC
estimated the flu
racked up these
staggering stats:¹**

More than 35.5
million illnesses

Over 16.5 million
medical visits

490,600
hospitalizations

34,200 deaths

Protect³

The flu vaccine prevented about 4.4 million flu illnesses and 58,000 flu-related hospitalizations during the 2018-2019 flu season. Still, more than half of adults skipped their flu vaccine, which left them vulnerable to a serious, contagious disease.

Why on-site clinics?

- Employees can get their flu vaccine and return to work.
- Employees can conveniently schedule online.
- All employees can visit the on-site clinic, regardless of their insurance (claims billing available for most insurances).
- Promotional materials are available to encourage employees to participate.

Contact your account representative to schedule on-site flu vaccinations to help protect your employees and your organization.

Keep your employees safe and healthy this year. Give them an on-site flu vaccination clinic and show them you care about their well-being. It can help protect your employees and your bottom line.

Next steps

To schedule an on-site flu vaccination clinic or to request additional information, contact your account representative.
